Global Issues and Leadership in the Age of AI: From Technology to Human Values

**Full Professor
Dr. Ana Maria Lara
Palma**

Burgos University (Spain)
Department of
Organizational Engineering

Director of Equality and
Social Inclusion

In the age of AI, technological change is reshaping global challenges, economic systems, and social relations.

However, powerful tools alone are not enough: leadership today must be guided by human values, ethics, and a deep sense of social responsibility.

This seminar invites university students to explore how Artificial Intelligence, diversity, and inclusion shape the way we lead, work and live together.
