

Message to Young Talents

Academic Exchange with the University of Strasbourg, an Intellectual Hub of Europe

Since signing an agreement in July 2002, Ochanomizu University and the University of Strasbourg in France have maintained academic exchanges for over 20 years through researcher mobility and student exchange programs. This symposium invites President Frédérique Berrod from the University of Strasbourg and discusses the significance and prospects of university-level international exchange, reflecting on Ochanomizu University's history and its track record of exchange with the University of Strasbourg. We expect these discussions will be an inspiring message to young talents aspiring to global success.
