

Film Dance Festival Overview

Ayaha Matsuoka

The main purpose of the International Academic Discussion was to examine all aspects of dance on film and video, what I call "video dance".

This was to be a comprehensive study, in a manner that has not been carried out in Japan before.

As a result of this study, I have reviewed my ideas, and modified my approach.

I would now like to focus on those who have difficulty dance; for example, people with disabilities, or the elderly.

Video dance makes it possible to show them as vividly as professional dancers, and I regard this as a new direction for this art form.
